*In 2008 Goldman Sachs donated 74% to Democrats. All other groups in this column donated between 31-69% to both parties. This column does not differentiate between giving equally to both parties and giving 70-79% to Democrats or Republicans.

**This number includes the “City of New York”. Although it is officially listed as “other” by Open Secrets (neither corporate, union, nor ideological), I was personally informed by someone from the organization that Michael Bloomberg was the main source of this funding.
